

Canon varioPRINT 140

Integral Productivity

Designed for light- and mid-volume production with print speeds up to 140 images per minute and support for peak volumes up to 2.2 million letter-size images per month.

Unique productivity tools for production planning and monitoring

PRISMAsync Job Scheduler for up to 8 hours of plan ahead production

PRISMAsync Remote Manager provides remote job submission, management and monitoring to help maximize efficiencies

Application Quality

DirectPress Technology eliminates unstable variables such as charge, static and light consistently providing uniform, stable and high print quality images

ScreenPoint Technology delivers superb image quality and automated smooth grayscale reproduction from all files, black and white or color

Sustainability

No ozone emissions, selenium, fuser oil or developer and virtually no toner waste or particle emissions

EPA ENERGY STAR® rated with one of the lowest energy consumption per print in its segment

HeatXchange technology's clever reuse of energy helps reduce energy consumption and helps reduce sticking and curling and prepares the sheets for finishing.
